Abstract. The use of electronic books is increasing with the common use of electronic devices. In our country, the scope of many projects such as 5001 Call for Academic e-Book and FATİH is undertaken to enrich electronic textbooks with multi-media elements. However, when studies are analyzed in our country, it is realized that there are not comprehensive research about design issues of e-books. This study presents international research sample studies, examines guidelines for designing e-books.
